

COMING SOON...

Conversations at SPS

Speech Pathology Services is proud to announce our most exciting community program to date: Conversations at SPS. Through monthly meetings, Conversations at SPS will serve as an education and support group for families who want to learn more about speech, language, and sensory processing disorders. Families will have a chance to share their story and listen to how members of the community have worked with their children. The event will be led by Mindy Cohen, founder of Speech Pathology Services.

If you are interested, please give us your contact information as well as a general idea of what topics you would like discussed, and we will contact you.
